EDUCATION

University of Chicago Expected December 2027
M.S. in Applied Data Science
- **Awards:** The Data Science Institute Scholarship

University of Pennsylvania August 2018 - May 2022
B.S.E in Computer Graphics, Minors in Mathematics and Fine Arts
- **Overall GPA:** 3.67 / 4.0
- **Select Courses:** Artificial Intelligence, Big Data Analytics, Interactive Computer Graphics, Procedural Graphics

WORK EXPERIENCE

InterSystems July 2022 - February 2025
Quality Development Engineer *Cambridge, MA*

· Conducted HL7 FHIR conformance testing using tools like Inferno and Touchstone to help the platform reach ONC (g)(10) certification for standardized patient data access
· Validated the MVP release of Bulk FHIR data export from end to end, covering areas like asynchronous data transfer, OAuth2 authorization workflows, and REST API endpoints to ensure secure exchange of large clinical data
· Built automated testing pipelines with Python scripts, relational databases, and email reports with test-result analytics to increase sprint cycle efficiency by 20%
· Queried archived test result and build data to narrow down causes of test failures, saving development teams 5 hours of debugging each week
· Developed upgrade tests for systems migrating from legacy storage to new data models to ensure data integrity
· Documented and maintained 10+ Confluence pages about internal testing frameworks to improve cross-team communication and reduce new-hire onboarding tim

SELECT PROJECTS

Clothing Brand Product Composition Data Analysis February 2026 - April 2026

· Built a data pipeline scraping fabric composition data from public API endpoints across 26 clothing brands with Asian cultural influence, wrangling the regex-extracted data into a structured CSV of over 700 products
· Implemented K-means clustering with elbow plot analysis to segment products by fabric composition, revealing a heavy reliance of cheap polyester materials across all garment types
· Trained a Random Forest regressor on 280 scraped products to predict product price, outperforming a category-median baseline by 19% MAE reduction

Apparel Brand Development March 2025 - Present

· Identified a potential market whitespace for a Chinese American culturally-influenced clothing line in the United States
· Conducted organic social media marketing to build brand identity and interact directly with potential customers for design feedback
· Experimented with digital design development through tech packs and outsourced manufacturing as well as original sample creation through sewing and pattern-making

TECHNICAL SKILLS

Programming Languages	Python, C++, SQL, JavaScript, Java, GLSL
ML & Data Science	scikit-learn, pandas, NumPy, PyTorch, matplotlib, Tableau
Tools & Platforms	AWS, Docker, Git, CI/CD, Linux, REST APIs
